PROFILE

I finished my second year at Kocaeli University with a GPA of 3.09. Over the past two years, I have improved myself in my field by taking part in various projects and events. In this context, I discovered my skills such as teamwork and finding solutions to problems. I created a portfolio on my GitHub account with the projects I developed, and thus I mastered many programming languages.

I would be happy to join and contribute to your team.

Kind regards.
